

Web 2.0 Tools for the 21st Century Classroom

March 1, 8, 15, 22, 29 & April 5, 12, 26 & May 3, 10

4:00 PM - 7:00 PM

45 PDPs

Description: Information, Communications & Technology Literacy skills increasingly are being recognized as the skills that separate students who are prepared for complex life and work environments in a technology and media-suffused environment, marked by access to an abundance of information, rapid changes in technology tools, and those who are not. This 30-hour course is framed around the use of current digital technologies for engaging and challenging students in learning and applying 21st century communication and collaboration skills. Through practical, hands-on application of Web 2.0 tools, participants will explore how to effectively embed digital technology and communication tools within classroom activities to enhance instruction and assessment.

Skills/Observable Outcomes: Participants will be able to integrate Web 2.0 applications into classroom learning activities that are appropriately matched to content standards and that enhance student information literacy skills.

Instructor: Matthew Riordan has more than 12 years of experience as a secondary science teacher with the Braintree Public Schools. His particular area of interest is the integration of technologies into classroom activities that leverage the development of 21st century technology literacy skills of his students. He holds an M.A.T. in Science Education & M.Ed. in Educational Media & Technology.

Audience PK-12 Teachers. Course is limited to 28 participants.
Location Braintree High School (Computer Lab Rm. # 359), 128 Town Street, Braintree, MA 02184
